CONTENTS

Volume 24, Issue Nos. 1–12 (1987)

International Journal for

NUMERICAL METHODS IN ENGINEERING

Issue No. 1

A Turbulence Model for Buoyant and Combusting Flows: D. B. Spalding 1

Three-dimensional Transient Thermo-elastic Analyses by the BIE Method: A. Chaudouet 25

Thermal Stress Analysis of Sintering Using a Moving Grid: B. Dorri, V. Kadambi, F. W. Staub and D. R. Lynch 47

Experiences in Non-linear Analysis of Temperature Fields with Finite Elements: J. F. Stelzer and R. Welzel 59

Numerical Methods for Heat Transfer in Hydraulic Fracturing: K. Bennaceur, A. Dunand and P. Stephenson 75

Numerical Studies of Buoyancy-driven Turbulent Flow in a Rectangular Cavity: C. P. Thompson, N. S. Wilkes and I. P. Jones 89

An Unstructured Multigrid Method for Elliptic Problems: R. Löhner and K. Morgan 101

A Finite Element Method for Free and Forced Convection Heat Transfer: R. J. Schnipke and J. G. Rice 117

The Effect of Explosion Venting in Empty Vessels: J. R. Bakke and B. H. Hjertager 129

Numerical Models for the Thermo-mechanical Evolution of Atlantic-type Continental Margins: S. A. P. L. Cloetingh and G. Wisse 141

Least-squares Schemes for Time Integration of Thermal Problems: J. Kujawski and N.-E. Wiberg 159

Heat Transfer in Solid State Laser Systems: Applications of Dynamic ADI Methods: R. J. Gelinas, S. K. Doss, S. S. Murty and J. B. Trenholme 177

Pulverized Coal Conversion in Downflow Gasifier: T. X. Phuoc and P. Durbetaki . . 203

Numerical Simulation in Precision Castings: R. Hamar 219

Mixing and Solidification of a Turbulent Liquid Jet in a Co-flowing Stream: P. G. Enright, L. Katgerman, J. C. Ludwig and S. Rogers 231

Lanczos Method for Heat Conduction Analysis: B. Nour-Omid 251

On the Extrusion of Visco-elastic Fluids Subject to Viscous Heating: J. F. Milthorpe and R. I. Tanner 263

An Enthalpy Method for Convection/Diffusion Phase Change: V. R. Voller, M. Cross and N. C. Markatos 271

CONFERENCE DIARY 285

Indexed or abstracted by 'Current Contents', 'Science Citation Index' and other leading Indexing/Abstracting Services

Issue No. 2

A Block Equation Solver for Large Unsymmetric Linear Equation Systems with Dense Coefficient Matrices: M. M. Stabrowski 289

A Global Mapping Method for Improving the Performance of Quadratic Elements: B. Nath and S. G. Potamitis 301

An Adaptive Procedure for Eigenvalue Problems Using the Hierarchical Finite Element Method: O. Friberg, P. Möller, D. Makovička and N.-E. Wiberg 319

A Simple Error Estimator and Adaptive Procedure for Practical Engineering Analysis: O. C. Zienkiewicz and J. Z. Zhu 337

The Method of Moving Asymptotes—a New Method for Structural Optimization: K. Svanberg 359

Making Curved Interfaces Straight in Phase-change Problems: M. Storti, L. A. Crivelli and S. R. Idelsohn 375

Treatment of Material Discontinuities in Finite Element Computations: R. J. MacKinnon and G. F. Carey 393

Evaluating Eigenvalues for Boundary Value Problems of Heat Conduction in Rectangular and Cylindrical Co-ordinate Systems: A. Nowak, R. Bialecki and K. Kurpisz 419

Finite Element Solution of Three-dimensional Incompressible Fluid Flow Problems by a Preconditioned Conjugate Residual Method: M. P. Robichaud and P. A. Tanguy 447

One-dimensional Calculations of Two-phase Mixing Flows: A. Thyagaraja, D. F. Fletcher and I. Cook 459

CONFERENCE DIARY 471

ANNOUNCEMENTS 474

Issue No. 3

A Finite Element Solution Method for Contact Problems with Friction: N. Chandrasekaran, W. E. Haisler and R. E. Goforth 477

Using Eigenvector Projections to Improve Convergence in Non-linear Finite Element Equilibrium Iterations: A. Eriksson 497

Mapped Infinite Elements in Soil Consolidation: L. Simoni and B. A. Schrefler . . 513

An Improved Computational Technique for Perturbations of the Generalized Symmetric Linear Algebraic Eigenvalue Problem: W. B. Bickford 529

The Tanh Transformation for the Solution of Singular Integral Equations: G. Tsamasphyros and P. Androulidakis 543

The Method of Lines and Exponential Fitting: P. J. van der Houwen and F. W. Wubs 557

Adaptive Refinement for Least-squares Finite Elements with Element-by-element Conjugate Gradient Solution: B.-N. Jiang and G. F. Carey 569

A New Efficient Mixed Formulation for Thin Shell Finite Element Models: J. J. Rhiu and S. W. Lee 581

BEM Simulation of Cathodic Protection Systems Employed in Infinite Electrolytes: N. G. Zamani, J. M. Chuang and J. F. Porter 605

Transient Analysis of Three-dimensional Wave Propagation Using the Boundary Element Method: J. L. Dohner, R. Shoureshi and R. J. Bernhard 621

An Improved Discrete Kirchhoff Quadrilateral Thin-plate Bending Element: C. Jeyachandrabose, J. Kirkhope and L. Meekisho 635

LETTERS TO THE EDITOR 655

CONFERENCE DIARY 659

ANNOUNCEMENTS 662

Issue No. 4

A Hybrid Model for Prismatic Solids: M. Cannarozzi 663

Practical Stability Analysis of Finite Difference Equations by the Matrix Method: J. Sucec 679

A Finite-element–Alternating Technique for Evaluating Mixed Mode Stress Intensity Factors for Part-elliptical Surface Flaws: H. L. Simon, P. E. O'Donoghue and S. N. Atluri 689

Stress Oscillations in Plane Stress Modelling of Flexure—a Field-consistency Interpretation: G. Prathap, G. Subramanian and C. Ramesh Babu 711

Generalized Geometric Programming with Many Equality Constraints: S. A. Burns . 725

The Dynamic Analysis of a Flat Plate under a Moving Load by the Finite Element Method: J-S. Wu, M-L. Lee and T-S. Lai 743

Semiconductor Device Modelling from the Numerical Point of View: S. J. Polak, C. Den Heijer, W. H. A. Schilders and P. Markowich 763

Correction 839

CONFERENCE DIARY 840

Issue No. 5

Numerical Tests for Assessing Finite Element Model Convergence: A. Verma and R. J. Melosh 843

The Front-tracking Scheme for the One-dimensional Freezing Problem: H. G. Askar 859

Trefftz Method: Fitting Boundary Conditions: A. P. Zielinski and I. Herrera 871

Substepping Schemes for the Numerical Integration of Elastoplastic Stress–Strain Relations: S. W. Sloan 893

Model-size Reduction for the Analysis of Symmetric Structures with Asymmetric Boundary Conditions: A. K. Noor and S. L. Whitworth 913

The Uniqueness Characteristics of Mixed Finite Element Methods in Linear Elasticity: J. C. Boot 927

Time-domain Analysis of Infinite Fluid Vibration: S. K. Sharan 945

A Self-adaptive Co-ordinate Transformation for Efficient Numerical Evaluation of General Boundary Element Integrals: J. C. F. Telles 959

An Automatic Design Optimization Procedure to Minimize Fillet Bending Stresses in Involute Spur Gears: J. D. Andrews and E. J. Hearn 975

Some Improvements of the Finite Element Solution for One-dimensional Problems: G. N. Gatica 993

A Hybrid BEM Model: E. Schnack 1015

CONFERENCE DIARY 1027

CORRECTIONS 1029

ANNOUNCEMENTS 1030

Issue No. 6

A New Element Used in the Non-orthogonal Boundary Plate Bending Theory—an Arbitrarily Quadrilateral Element: P. G. Ming and L. S. Fa 1031

Robust, Geometrically Based, Automatic Two-dimensional Mesh Generation: P. L. Baehmann, S. L. Wittchen, M. S. Shephard, K. R. Grice and M. A. Yerry 1043

A Numerical Method for Dynamic Analysis of a General Cross-section Rod Under Combined Loads: K. Nagaya, T. Goto, T. Sasaki and S. Ikai 1079

Sparse Quasi-Newton LDU Updates: R. P. Tewarson and Y. Zhang 1093

Norm Methods and Partial Weighting in Multicriterion Optimization of Structures: J. Koski and R. Silvennoinen 1101

An Efficient Quadrilateral Element for Plate Bending Analysis: A. F. Saleeb and T. Y. Chang 1123

Multi-objective Optimization of Fuzzy Structural Systems: S. S. Rao 1157

The Effect of Compatibility Conditions on Optimal Design of Flexural Structures: U. Kirsch 1173

An Adaptive Boundary Element Method: P. S. Han and M. D. Olson 1187

Triangular Finite Element for Analysis of Thick Laminated Plates: R. A. Chaudhuri and P. Seide 1203

BOOK REVIEWS 1225

CONFERENCE DIARY 1229

ANNOUNCEMENT 1232

Issue No. 7

Numerical Simulation of Confined Unsteady Aerodynamical Flows: A. Frey, C. Hall and T. Porsching 1233

A New Boundary Finite Element Method for Fluid–Structure Interaction Problems: J. B. Mariem and M. A. Hamdi 1251

A Basis Change Strategy for the Reduced Gradient Method and the Optimum Design of Large Structures: K. T. Joseph 1269

Least-squares Finite Element Method and Preconditioned Conjugate Gradient Solution: G. F. Carey and B. N. Jiang 1283

Numerical Experiments on Turbulent Flow Using the Random Vortex Method: J. Laitone 1297

Singular Element Construction using a Mapping Technique: G. Tsamasphyros . . 1305

The Comparative Performance of Some Finite Difference Equations for Transient Heat Conduction: M. C. Bhattacharya and M. G. Davies 1317

An Extension of the Application of Transmission Line Modelling (TLM) to Thermal Diffusion to Include Non-infinite Heat Sources: S. Pulko, W. A. Green and P. B. Johns 1333

A Grid Generator Based on 4-Triangles Conforming Mesh-refinement Algorithms: M.-C. Rivara 1343

On the Preconditioned Conjugate Gradient Method for Solving $(A-\lambda B)X=0$: M. Papadrakakis and M. Yakoumidakis 1355

Hybrid-Trefftz Plate Bending Elements with *p*-Method Capabilities: J. Jirousek . . 1367

On the Numerical Integration of a Class of Pressure-dependent Plasticity Models: N. Aravas 1395

CONFERENCE DIARY 1417

ANNOUNCEMENT 1419

Issue No. 8

Stability Convergence and Accuracy of the Dufort and Frankel Difference Diagram Approximating A Class of Non-linear Parabolic Field Equations: S. Wiak 1421

Residual Flow Procedure For Sea Water Intrusion in Unconfined Aquifers: S. Sugio and C. S. Desai 1439

LU Decomposition of Matrices with Augmented Dense Constraints: P. D. Thomas and R. A. Brown 1451

Finite Element Analysis of Quasi-prismatic Bodies Using Chebyshev Polynomials: S. M. V. Vijayakar, H. R. Busby and D. R. Houser 1461

Numerical Simulation of Electrodeposition Problems: N. G. Zamani, J. M. Chuang and C. C. Hsiung 1479

A Plane Hybrid Element with Rotational D.O.F. and Adjustable Stiffness: R. D. Cook 1499

The 'Effective-stress-function' Algorithm for Thermo-elasto-plasticity and Creep: M. Kojić and K. J. Bathe 1509

Making the Boundary Element Method Less Sensitive to Changes or Errors in the Input Data: M. Vable 1533

On the Condition 'h Normal to the Wall' in Magnetic Field Problems: A Bossavit 1541

An Integral Equation Method for the Solution of 3-dimensional, Non-linear, Magnetostatic Problems: J. Loines and M. J. M. Bernal 1551

Triangular Finite Element for Analysis of Thick Laminated Shells: P. Seide and R. A. Chaudhuri 1563

Application of the Finite Element–Difference Method to Vibration Problems: X. Huang and R. D. Cook 1581

CONDIF: A Modified Central-difference Scheme for Convective Flows: A. K. Runchal 1593

CONFERENCE REPORT 1609

CONFERENCE DIARY 1611

Issue No. 9

Effective Hybrid Hierarchical Element Generator for Vibration Analysis of Plates: A. Alaylioglu and H. Alaylioglu 1615

The Space–Time Sinc–Galerkin Method for Parabolic Problems: D. L. Lewis, J. Lund and K. L. Bowers 1629

Discrete Green Functions for Layered Strata: H.-T. Lin and J. L. Tassoulas 1645

Elastic Strain Effects During Steady-state Rolling of Visco-elastic Slabs: Y. Shimazaki and T. Shiojima 1659

Isotropic Plate Elements with Shear and Normal Strain Deformations: G. Z. Voyiadjis and R. W. Pecquet, Jr. 1671

A New Approach for the Hybrid Element Method: W. Chen and Y. K. Cheung . . 1697

Direct Computation of Cauchy Principal Value Integrals in Advanced Boundary Elements: M. Guiggiani and P. Casalini 1711

Notes on the Stability of Non-rectangular Space–Time Finite Elements: C. I. Bajer 1721

Finite Elements in CFD: What Lies Ahead: R. Löhner 1741

Plotting of Contours in a Natural Way: J. F. Stelzer and R. Welzel 1757

A New Finite Element Concurrent Computer Program Architecture: C. Farhat and E. Wilson 1771

A Theorem Regarding the Locking of Tapered Four-noded Membrane Elements: R. H. MacNeal 1793

Calculation of Fracture Mechanics Parameters for an Arbitrary Three-dimensional Crack, by the 'Equivalent Domain Integral' Method: G. P. Nikishkov and S. N. Atluri 1801

LETTERS TO THE EDITOR 1823

CONFERENCE DIARY 1825

Issue No. 10

Dynamic Response Optimization Using an Active Set RQP Algorithm: O. K. Lim and J. S. Arora 1827

Computer Algorithms for Calculating Efficient Initial Vectors for Subspace Iteration Method: T.-C. Cheu, C. P. Johnson and R. R. Craig, Jr. 1841

Basis Random Variables in Finite Element Analysis: M. A. Lawrence 1849

Interactive Solution to Multiobjective Optimization Problems: A. Diaz 1865

An Analysis of Solidification Problems by the Boundary Element Method: N. Zabaras and S. Mukherjee 1879

The Use and Efficiency of the Theorems of Structural Variation for Finite Element Analysis: B. H. V. Topping and A. M. Abu Kassim 1901

A Posteriori Estimates of the Solution Error Caused by Discretization in the Finite Element, Finite Difference and Boundary Element Methods: D. W. Kelly, R. J. Mills, J. A. Reizes and A. D. Miller 1921

A Finite Element for Edge-cracked Beam Columns: T. M. Tharp 1941

A Finite Element Model for Column-supported Shells of Revolution: K. J. Han and W. W. Tu 1951

Self-adaptive Stress Analysis Based on Stress Convergence: P. Roberti and M. A. Melkanoff 1973

A Numerical Study of Steady Plane Granular Chute Flows using the Jenkins–Savage Model and its Extension: F. Szidarovszky, K. Hutter and S. Yakowitz 1993

Field-consistency and Violent Stress Oscillations in the Finite Element Method: G. Prathap and C. Ramesh Babu 2017

BOOK REVIEWS 2035

Issue No. 11

Design Sensitivity Analysis of Non-linear Structural Dynamics Part I: Theory: K. K. Choi and J. L. T. Santos 2039

Preconditioned Conjugate Gradient Technique for the Analysis of Symmetric Anisotropic Structures: A. K. Noor and J. M. Peters 2057

An 'Upwind' Finite Element Method for Electromagnetic Field Problems in Moving Media: S.-Y. Hahn, J. Bigeon and J.-C. Sabonnadiere 2071

An Expert System for the Optimal Mesh Design in the *hp*-Version of the Finite Element Method: E. Rank and I. Babuška 2087

Finite Element Calculation of Three-dimensional Hot Forging: G. Surdon and J. L. Chenot 2107

Equilibrium Considerations of the Updated Lagrangian Formulation of Beam-columns with Natural Concepts: M. Gattass and J. F. Abel 2119

Convected Systems for Curved Structural Elements: M. Gattass and J. F. Abel . . 2143

On Artificial Strain of Thin Curved Elements: M. Gattass and J. F. Abel 2167

Selective Refinement: A New Strategy for Automatic Node Placement in Graded Triangular Meshes: W. H. Frey 2183

Petrov–Galerkin Method for Multidimensional, Time-dependent, Convective-diffusion Equations: C.-C. Yu and J. C. Heinrich 2201

A New Partially Bonded Beam Element for Analysis of Shear Walls: S. C. Chakrabarti, G. C. Nayak and D. K. Paul 2217

CONFERENCE DIARY 2237

ANNOUNCEMENT 2239

Issue No. 12

Composite Mappings for Planar Mesh Generation: R. H. Crawford, W. N. Waggenspack, Jr., D. C. Anderson and M. J. Bailey 2241

Boundary Elements for Three-dimensional Elastic Crack Analysis: M. L. Luchi and S. Rizzuti 2253

A Legendre Spectral Element Method for the Stefan Problem: E. M. Rønquist and A. T. Patera 2273

FEM-analysis of Transverse Vibrations of an Axially Moving Membrane Immersed in Ideal Fluid: J. Niemi and A. Pramila 2301

Adaptive Mesh Redistribution for a Boundary Element (Panel) Method: G. F. Carey and S. Kennon 2315

A New Approach to the Finite Element Modelling of Beams with Warping Effect: S. W. Lee and Y. H. Kim 2327

Dynamics of the Bilinear Mindlin Plate Element: R. A. Brockman 2343

Second Order Sensitivity Analysis of Lumped Mechanical Systems in the Frequency Domain: J. Wicher and A. G. Nalecz 2357

Arch Dam–Fluid Interactions: by FEM-BEM and Substructure Concept: C.-S. Tsai and G. C. Lee 2367

An Assumed Covariant Strain Based 9-Node Shell Element: J. Jang and P. M. Pinsky 2389
Non-linear Analysis of Elastic Plane Frames with Crooked Bars: A. F. Economou and A. N. Kounadis 2413
CONFERENCE DIARY 2429
